Project Demo Planning

Date	28 October 2026
Team ID	[Insert Your Actual Team ID, e.g., TM-1042]
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytics
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	**Project Overview & Problem Statement** Introduction & Clinical Problem Framing	Introduce Health360, highlight chronic disease burdens, and present target personas (CMO, Hospital Admin) via Empathy Mapping.	1.0 min	Team Lead / Presenter 1
2	**Solution Architecture & Technology Stack** Architecture & Data Pipeline	Explain the 3-tier architecture: Snowflake HEALTH360_DB data warehouse, Tableau analytics engine, and Flask web container shell.	1.0 min	Data Engineer / Presenter 2
3	**Live Feature Demo — Executive Dashboard** Executive Overview Dashboard	Live demonstration of macro population metrics, age stratification (18–34 to 65+), and WHO BMI distribution filters.	1.5 mins	BI Developer / Presenter 3
4	**Live Feature Demo — Clinical Risk Dashboard** Clinical Risk & Symptom Burden Analytics	Live walkthrough of BMI vs. Glucose scatter plot, smoking/alcohol lifestyle risk compounding, and symptom burden correlation heatmap.	1.5 mins	BI Developer / Presenter 3
5	**Live Feature Demo — Executive Narrative Story** 4-Scene Guided Story & Web Integration	Demonstrate sequential narrative flow from population risks to hospital bed allocation embedded in Flask web shell (http://127.0.0.1:5001).	1.5 mins	Team Lead / Presenter 1
6	**Q&A & Performance Validation** Performance Testing & Stakeholder Q&A	Highlight 345ms Snowflake query performance, sub-second filter recalculation, and address evaluator questions.	1.5 mins	Entire Project Team

Demo Flow Summary:

Step	Activity	Notes
1	**Introduction & Problem Statement** Present slides covering project objectives, clinical pain points, and empathy mapping.	Establish clear motivation for proactive risk stratification over reactive hospital treatment.
2	**Solution Overview** Walk through system data flow diagram from raw CSV ingestion to Snowflake staging and Tableau JS API v2 embedding.	Emphasize HIPAA-compliant architecture and 345ms query history performance.
3	**Live Feature Demonstration** Navigate through live Flask web interface (http://127.0.0.1:5001) showing Executive Dashboard, Clinical Risk Dashboard, and 4-Scene Story.	Interactively toggle Age, BMI, Smoking, and Risk Tier filters to show sub-second recalculations.
4	**Q&A Session** Address panel questions on data pipeline methodology, feature engineering logic, and future wearable IoT integration.	Reference project repository links, performance audit logs, and documentation deliverables.
