Team Involvement in Demonstration

Date	28 October 2026
Team ID	[Insert Your Actual Team ID, e.g., TM-1042]
Project Name	Health360: Comprehensive Healthcare Risk & Disease Analytics
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the project demonstration. It ensures that every member contributes meaningfully to the presentation and that responsibilities are distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	[Insert Member 1 Name / Team Lead]	Team Lead & Web Integrator	Introduction, Project Overview & Flask Web Application Integration	Presented high-level clinical risk objectives, demonstrated embedded Tableau container in Flask (http://127.0.0.1:5001), and managed overall demo execution.	Active
2	[Insert Member 2 Name / Data Engineer]	Data Pipeline & Warehouse Engineer	Data Preprocessing, Feature Engineering & Snowflake Query Architecture	Explained 5,000 record cleaning pipeline, custom WHO BMI/Age binning, and presented Snowflake 345ms query execution logs.	Active
3	[Insert Member 3 Name / BI Developer 1]	Lead BI & Dashboard Developer	Executive Overview & Clinical Risk Dashboards	Walked through population age/BMI distribution, multi-variable BMI vs. Glucose scatter plots, and symptom co-occurrence heatmaps.	Active
4	[Insert Member 4 Name / BI Developer 2]	Storyteller & Performance QA Lead	4-Scene Executive Narrative Story & Performance Validation	Guided evaluators through the 4-scene narrative progression for hospital resource allocation and answered performance testing questions.	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	[Insert Team Lead Name]
Overall Team Coordination Rating (1-5)	5 / 5
Any issues during demo	Minor initial latency when embedding dynamic Tableau iframe containers into the Flask local server environment (http://127.0.0.1:5001).
How issues were resolved	Optimized Tableau JS API v2 initialization scripts and pre-cached visual worksheets to guarantee sub-second rendering prior to live evaluation.
